JJ Gault

Full Stack Developer (MERN)

Full-Stack software developer with big aspirations.
I began my coding journey in February of 2022 and I have been obsessed with software development ever since. I'm eagerly transitioning from a successful six-year insurance claim career into an industry I am truly passionate about. Although I have recently started my journey on this career path, I am confident that my work experience in demanding environments requiring exceptional interpersonal skills will translate well as I progress into Agile software development. My focus has been on the MERN stack but it is growing every day. I am currently a student at the University of Denver's Full-Stack Flex program with an anticipated graduation date of August 9th 2022.

Objective-Driven:
Consistent problem-solver; present a problem and I will find a solution.
Proactive:
First-in-line volunteer to face new challenges and step out of the comfort zone.

Denver, CO, USA

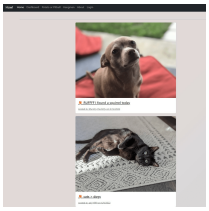
Skills

Tech Stack

- Node.js
- Express
- React
- MySQL
- MongoDB
- GraphQL

- Test-Driven Development (Jest)
- API Design
- Model-View Controller Paradigm
- Object Relational-Mapping (Sequelize)
- Shell Scripting
- Git & Continuous Integration
- HTML, CSS, JavaScript
- Server Side Development using MERN stack and other template engines.

Projects

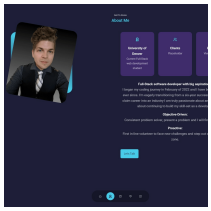


Teacup Yorkies

Deployed Page GitHub Repo

This application is a collaboratively developed social media application using the full-stack MVC paradigm.

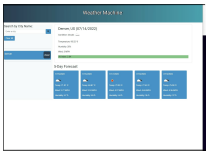
Visit the GitHub repo for full list of technologies used.



React Portfolio

Deployed Page GitHub Repo

This is my personal portfolio website I built using React, React Hooks and React-Spring package for custom animations.



Weather Machine

Deployed Page GitHub Repo

A weather application that takes a user's query, fetches data from OneCall Weather API and then dynamically generates results within the webpage.

BlogBuster

Deployed Page GitHub Repo

My very first full-stack application which allows users to sign up/log-in with an encrypted password, post, edit and comment on other blog posts. Visit the GitHub repo for full list of technologies used.

Recent Work Experience

Inside Property Claim Professional

Travelers Insurance

June 2018 - February 2022
Centennial, Colorado

Provided mentoring and coaching to less experienced claims professionals to ensure an effective team.
Handled 1st party property claims of moderate severity and complexity as assigned.
Completed property inspection of losses including accurate scope of damages, photographs, written estimates and/or computer-assisted estimates.
Negotiated with multiple constituents, i.e.; contractors or client's representatives and convey claim settlements.

Education

2022 - 2022

University of Denver (Current Student)

MERN Stack (Full Stack Flex Program)

2007

W. Travis Loften High School

High School Diploma
